### PREAMBLE

The Spuhr® **Ideal Chassis System™ (SICS™)** is a modular chassis system, offering **Quick-Adjustable LOP and Recoil Pad Height**, and is designed to provide a rigid support of the barreled action for improved accuracy.

The standard SICS™ features:

- Aircraft grade aluminum alloy construction
- Folding stock assembly with adjustment for solid lockup
- Quick-adjustable length-of-pull (50 mm/1.97" travel) and recoil pad height (32 mm/1.25") – toolless and without play
- Height and length-adjustable cheek piece
- Length-adjustable proprietary pistol grip (8 mm/0.32" travel, AR-compatible)
- 16" Spuhr Interface™ forend with integrated ARCA Swiss rail and QD sling cups (13" version and 16" HBAR versions also available)
- AICS pattern magwell
- Built-in barricade stop

The SICS™ series is currently available for the following actions and with three different forends (13", 16", and 16" HBAR):

- Remington 700 Short Action (including select clones)
- Tikka T3/T3x Short Action calibers
- Tikka T3/T3x Long Action calibers
- Remington 700 Short Action clones with a low coking piece travel

Coming soon:

- Remington 700 Long Action
